

Ch 3.3 Homework

State which property the problem illustrates

① $5 \cdot p = p \cdot 5$

② $4 \cdot (x \cdot 10) = (4 \cdot x) \cdot 10$

③ $(c + 2) + 0 = c + 2$

④ $2 + (12 + r) = (2 + 12) + r$

⑤ $x + 7.5 = 7.5 + x$

⑥ $a \cdot 1 = a$

Simplify.

⑦ $6 + (5 + x)$

⑧ $(14 + y) + 3$

⑨ $6(2b)$

⑩ $9 \cdot c \cdot 4$
